I. Listening Comprehension

Section A

- | | | | |
|---|--|--|-------------------------|
| 1. A. A student. | B. A journalist. | C. A policewoman. | D. A waitress. |
| 2. A. In Washington. | B. In Shanghai. | C. In Singapore. | D. In Spain. |
| 3. A. To a bookstore | B. To a furniture shop. | C. To an art school. | D. To a clothing store. |
| 4. A. The man stayed up to prepare for the test. | B. The man went back home late last night. | D. The man hired a tutor for Biology learning. | |
| C. The man didn't study hard during the day. | | | |
| 5. A. She prefers to eat at home. | B. She dislikes Japanese food. | | |
| C. She wants to pay for the meal. | | D. She plans to order the food. | |
| 6. A. Go to the front of the line. | B. Apologize to the woman. | | |
| C. Accept the woman's apology. | | D. Let the woman go ahead of him. | |
| 7. A. She can speak English very fast. | B. She has no time to learn English. | | |
| C. Her spoken English is still not good. | | D. Her memory for English expressions is good. | |
| 8. A. The speech was not worth listening to. | B. The speaker didn't speak loud enough. | | |
| C. The speaker was too far away from him. | | D. The speech was too difficult to understand. | |
| 9. A. The strawberries are not fresh enough. | B. Fruit is not allowed before lunch time. | | |
| C. There are plenty of strawberries on the table. | | D. The strawberries will be served during lunch. | |
| 10. A. The man should take a seat in the front. | B. The man's glasses are too weak. | | |
| C. The man should wear his glasses in class. | | D. The man's glasses are out of fashion. | |

Section B

- | | |
|---|---|
| 11. A. The use of the leap year. | B. The inventor of the leap year. |
| C. The change of the leap year. | |
| 12. A. To celebrate the birth of Julius Caesar. | B. To even out an astronomical year. |
| C. To make the calendar match Earth's orbit. | |
| 13. A. A leap year is divisible by 100. | D. To let the calendar become more unique. |
| C. Every century year is a leap year. | |
| 14. A. The benefits of using paper bags. | B. A leap year often seemed full of troubles. |
| C. The process of making eco-friendly packing. | |
| 15. A. Boosted decomposition rates in nature. | D. The latest century-year leap year was 2000. |
| C. Elevated material and production expenses. | |
| 16. A. They require much water to produce. | B. The issues of plastic alternatives. |
| C. They need no tree cutting for production. | |
| 17. A. The number of tourists on the island. | D. The advantages of using glass bottles. |
| C. The popularity of the island with tourists. | |
| 18. A. To exercise on her vacation. | B. Lower cost and energy efficiency. |
| C. To practice her driving skills. | |
| 19. A. An entire day. | D. Total absence of environmental impact. |
| B. Half a day. | B. They have lower energy footprint. |
| 20. A. 12 years old | D. They break down in special facilities. |
| B. 14 years old. | B. Renting bikes and motorbikes on the island. |
| C. Two hours. | D. Different ways of getting around the island. |
| D. No time limit. | B. To teach her friends how to ride a bike. |
| C. 16 years old. | D. To explore the island during her holiday. |
| D. 18 years old. | |

I. Grammar and Vocabulary

Section A

The benefits of container gardening

Do you love gardening, but you don't have a yard? If that's the case, (21) take (take) container gardening into consideration. This method involves (22) grow plants in pots and containers rather than in the ground. Container gardening is a great way to grow flowers, herbs, vegetables, fruit trees and more. There are many advantages to this gardening method.

To begin with, you don't need much space. A roof or any other outdoor area that receives direct sunlight will work. In fact, a sunny, indoor kitchen windowsill (窗沿) is perfect for a few small plants, (23) which gives you easy access to herbs and vegetables as you prepare meals. The key is to choose a spot that receives a good deal of sunlight.

Unless they're too big or heavy, containers are portable. This allows you to move your plants inside if necessary. Or you can move your plants into the shade (24) extremely hot days. Containers allow you to place your plants (25) where they'll grow best.

With containers, you're almost certain (26) fill them with productive soil. Using a good bag of potting soil that contains the necessary nutrients for your plants is best. Here's an important tip: Once (27) stuff, large containers can get heavy. Therefore, it's best to put them at a proper place before filling them.

One of the greatest benefits of container gardening is that little or no weeding (28) require (require). For plants in the ground, weeding is sometimes a daily or weekly requirement.

People also love the fact that almost (29) can be used as a container. You don't need expensive pots for containers. Wooden boxes, cans, tea kettles, old shoes and more will work. There's no end to the number of items that can be used. Just be sure to drill holes in the bottom of your containers for proper water discharge.

(30) shows off your green fingers and your creativity is a container garden.

Section B

Directions: Complete the following passage by using the words in the box. Each word can be used only once. Note that there is one word more than you need.

A. adaptable	B. broadened	C. dramatically	D. handful	E. inevitably	F. likelihood
G. maintained	H. perception	I. properly	J. remarkable	K. suggested	

Sense of smell that seems impossible

How do we smell *odours* (气味)? The answer is that the olfactory bulb, a structure at the front of the brain, plays a vital role in our ability to smell. Or, at least, so we thought. Researchers have now discovered a (n) handful of women who have a perfectly normal sense of smell but who seem to lack olfactory bulbs.

The team, including Tali Weiss and Noam Sobel at the Sunshine Institute of Science in U.S., say a lack of olfactory bulbs is unusual but not unusual: one in 10,000 people don't have them,

but we had believed none could smell.

However, in the course of a study into possible links between ability to smell and reproduction, the team happened across a 29-year-old woman who was different: she lacked olfactory bulbs but 33 that her sense of smell remained very good.

Every test the researchers threw at her 34 that she did indeed have a good ability to distinguish odours, despite lacking the olfactory bulb typically believed necessary to do so. The team B the scope of its investigation, and found more women like this, but no men at all.

The researchers were able to estimate the 35 of being a woman who can smell normally without these brain structures to be about 0.6 per cent. Strangely, the probability of this happening is raised 3 in left-handed women. Among people who are left-handed, women who lack olfactory bulbs have a roughly 4 per cent chance of still being able to smell 38.

Sobel says this may be further proof as to how 39 the brain is: if it lacks olfactory bulbs, it can recognise itself so other brain regions take on the task of odour 40. Alternatively, the discoveries might hint that we know less about our ability to smell than we thought.

II. Reading Comprehension

Our days are becoming increasingly jam-packed. The reasons for the rise in "time (41) _____" are numerous, but corporate cultures that value busyness are at least partially to blame. Put simply, busyness has become a(n) (42) _____ symbol. Research led by the Columbia marketing professor Silvia Bellezza shows that people (43) _____ others who are busy to be important and impressive. (44) _____, newly-published studies led by the psychologist Jared Celniker have found that across the United States, France, and South Korea, people consider those who exert high effort to be "morally admirable," (45) _____ their output.

However, when it comes to corporate life, busyness is not a(n) (46) _____, and it is long past time that organizations stopped lionizing it. Evaluating employees on how busy they are is a terrible way to identify the most creative and productive talent. Yet many firms reward and promote only people who display how "hard" they're working. The effect on companies and their employees is (47) _____. Research indicates that when organizations (48) _____ employees, base their incentives primarily on the amount of time they work, and excessively monitor their activities, productivity and efficiency actually drop.

While managers now are more (49) _____ to reconsidering the value of busyness than they have been in a long time, the obsession with busyness still persist. One of social psychology's findings is that the harder people work to achieve something, the more they (50) _____ it. Known as "effort justification," this tendency arises even when a task is meaningless. And the more demanding the effort is, the more (51) _____ people feel. New hires forced to work long hours on a graveyard shift, for instance, might persuade themselves, if I work this hard, I must really want to be here. The problem is that while we go on (52) _____ the tiring labour, we fail to notice burnout creeping up on us.

Another reason organizations value busyness is that their customers do. In many cases customers (53) _____ effort with worth. In one simple demonstration of this phenomenon, experimenters showed that participants liked various items (such as a poem, a painting, and a suit

of armor) more and rated them higher in quality and value when they thought more (54) _____ had gone into producing them. Research by the Harvard Business School operations professor Ryan Buell found that cafeteria customers reported greater (55) _____ with their service when a sandwich was made in front of them-when they could observe the work that went into it- than when an identical sandwich was delivered to them.

| A | 41 | A. poverty | B. pressure | C. management | D. boundary |
| B | 42 | A. personal | B. status | C. moral | D. cultural |
| D | 43 | A. appoint | B. claim | C. convince | D. perceive |
| B | 44 | A. For example | B. In addition | C. As a result | D. On the contrary |
| C | 45 | A. depending on | B. subject to | C. regardless of | D. according to |
| D | 46 | A. burden | B. criterion | C. obstacle | D. virtue |
| A | 47 | A. substantial | B. moderate | C. trivial | D. marginal |
| B | 48 | A. overchange | B. overload | C. overvalue | D. overindulge |
| B | 49 | A. opposed | B. open | C. neutral | D. indulgent |
| D | 50 | A. dismiss | B. question | C. misinterpret | D. value |
| A | 51 | A. commitment | B. frustration | C. bitterness | D. anxiety |
| D | 52 | A. resisting | B. illustrating | C. exhibiting | D. justifying |
| A | 53 | A. equate | B. compare | C. combine | D. confuse |
| C | 54 | A. vigor | B. status | C. effort | D. variety |
| D | 55 | A. coverage | B. complaints | C. ratings | D. contentment |

Section B

(A)

We often picture today's teens as social-media addicts. They stare at their phones 24/7 and lash out when they can't have their WeChat fix. But the truth is more complicated: While they depend on social media to keep up with friends, it does have a tendency to make them feel helpless under the pressure, and they know it.

When I spoke to four students at Notre Dame High School in Sherman Oaks, Calif., as part of my nation-wide teen listening tour, they told me they make conscious choices about who they share things with on social media, how they manage their accounts and how they handle their own burnout.

While teens generally acknowledge that social media helps them keep up with their friends, around 45% of them say they feel troubled by the drama they often encounter, according to Pew Research Center. Roughly four in 10 teenagers say they feel pressure to post only things that show them in a positive light or that generate a lot of comments or likes.

Many teens even take voluntary breaks from social media, according to a study conducted by the Associated Press and NORC Center for Public Affairs Research at the University of Chicago. It found that 60% who have taken breaks have taken three or more, and 23% of teens who haven't taken a break from social media have wanted to take one. About half of teens say their social-media breaks are typically a week or longer.

The Sherman Oaks teens I spoke with say they too have taken breaks to avoid burnout. They all have friends who don't even bother with social media, and they say they admire it. Still, the fear of missing out usually draws them back. Or, as one of the four students told me, "It kind of gets a little lonely after a while."

56. The expression "lash out" (paragraph 1) can be best replaced by _____.
 A. take on B. break away C. pass off D. blow up
57. It is indicated in the passage that _____ is some teens' intentional action on social media.
 A. selecting what to post B. letting others handle their posts
 C. showing their displeasure D. quitting to keep from feeling hurt
58. According to the passage, some teens take breaks from social media to _____.
 A. gather more materials for online drama B. escape the pressure of making comments
 C. avoid feeling left out by their peers D. relieve exhaustion from being disturbed
59. Which of the following is the best title of the passage?
 A. The downside of social media: Why teens get addicted
 B. The social media: More connectivity than isolation among teens
 C. The unseen consequences of social media: A teenage perspective
 D. The influence of social media: A comprehensive teenage analysis

(B)

4 Surprising Things Your TV Can Do

The average household in the U.S. has at least one "smart" internet-connected TV, which can have content streamed straight to it. If you have a smart TV in your home, are you taking full advantage of all the great features it has to offer? Check out these amazing skills and start using them today.

1. Respond to Your Voice Commands

Rather than clicking through menus, a lot of TVs now let you control certain functions using your voice—usually through a built-in virtual assistant like Amazon's Alexa (on all Fire TVs) and Google Assistant (available on many models, including Hisense, LG and Samsung). Roku TVs can also be controlled by voice (through a microphone in the remote). Most will let you turn the TV on or off, search for content, pause or rewind, and more.

2. Find Your Misplaced Remote

Some TVs can ring your remote to help you find it. For example, on some Sony models you can click the TV's power button, then select "Find Remote," and the remote will beep. Some remotes for Roku and Amazon Fire TVs also offer this feature. For example, with Amazon's Alexa Voice Remote Pro for Fire TV, you can say, "Find my remote" to any Amazon device with Alexa or press the "Remote Finder" button in the Fire TV app's section.

3. Make Closed Subtitles Easier to Read Many TVs let you enlarge the text in closed subtitles and standard TV menus for easy reading. On Samsung models, this feature is called Zoom Menu and Text. On Sony Google TVs, it's called Text Magnification. Often, the zoom and enlarged text features can be turned on at the same time. (On Samsung models, you can also select "Learn Menu Screen," which audibly tells you about each of the settings and what they do.)	4. Showcase Your Favourite Photos Want to show off your latest vacation photos without passing your phone around the room? If you have an iPhone, go to Apple AirPlay Screen Mirroring to have an AirPlay-suited TV show what's currently on your iPhone's screen. With an Android phone you can "cast" your photos to a TV that's equipped with Google Chromecast, such as LG, Sony and Hisense, by opening the Google Photos app and selecting "Cast."
---	---

60. Which of the following statements about the smart TVs in the leaflet is true?

- A. Fire TVs are known for locating remote controls using sound.
- B. Sony TVs can be controlled hands-free with voice commands.
- C. Samsung TVs are characterised by expanded and spoken subtitles.
- D. Hisense TVs with Google Assistant can cast photos from iPhones.

61. As a shop assistant, which pair of skills of the smart TVs will you most likely introduce to the Smiths, a couple both with hearing and speech disabilities?

- A. 1 and 2.
- B. 2 and 3.
- C. 3 and 4.
- D. 1 and 4.

62. It can be concluded from the leaflet that smart TVs _____.

- A. depend specially on physical remotes
- B. extend beyond standard TV capabilities
- C. exclude advanced text display features
- D. have restricted mobile device integration

(C)

Unemployment is a significant problem in many developing countries. Without steady work, individuals struggle to rise out of poverty, and the community as a whole also misses out. Many unemployed people could have done much good through their labour if they had been given the opportunity to contribute. Worse, without opportunities for proper employment, young people sometimes turn to crime and violence in order to provide for themselves. Thus, giving people opportunities to work is essential for the community's well-being.

Education plays a vital role in equipping people for certain jobs, but many young people find that even if they are qualified, the jobs are just not there. This was the situation that Rwanda's entrepreneur (企业家) Noel Nizeyimana faced. When he graduated from university with a degree in soil and environmental science, he sent out application after application but received no job offers, so he turned to creating his own business. With three of his colleagues, he founded Greencare Rwanda Ltd., a company that transforms waste into products that can be used for various purposes. For example, one of the company's programs processes waste and turns it into organic fertilizer. The company has also expanded into plastic recycling and

produces paving materials from sand and plastic. Thus, Greencare Rwanda is providing materials for other industries as well.

Greencare Rwanda Ltd. was able to get off the ground largely due to funds it received from the UN Youth Joint Programme. This program is an attempt to reach the UN's sustainable development goal of "decent work and economic growth." The assistance definitely helped Greencare, which now produces 400 tons of fertilizer and 2,560 square meters of paving materials per year. It also employs 25 people, which shows that helping people start businesses provides work for more than just the person who receives the funds.

All this raises the question of what more can be done to empower young people to start their own businesses. Providing funds to cover the initial costs, as the UN Youth Joint Programme did for Nizeyimana, is certainly important as the starting costs for businesses can be extremely high. Governments are sometimes hesitant to provide funds to startups because success is not guaranteed. Starting a business is risky, and nobody wants to waste money, but experts warn that governments should not enforce too many requirements. Different regions will need different approaches, so trying to enforce a set of one size fits all requirements can **run counter to the desire**.

While there are other ways to address unemployment, encouraging young business owners is one of the most effective—especially when those businesses produce goods that genuinely help local communities.

63. What is paragraph 1 mainly about?

- D
- A. The role of the government in creating job opportunities.
 - B. The importance of education for reducing unemployment rates.
 - C. The necessity of providing work opportunities to prevent crime.
 - D. The consequences of unemployment on individuals and communities.

64. Greencare Rwanda Ltd. is mentioned in the passage to show ____.

- B
- A. why setting goals for the youths is necessary
 - B. how the support from the UN programme works
 - C. international funding's success across all industries
 - D. difficulties young graduates encounter in job hunting

65. The phrase "**run counter to the desire**" (paragraph 4) most probably refers to ____.

- B
- A. opposing the general goal of supporting entrepreneurship
 - B. conflicting with the hope of diverse and region-specific solutions
 - C. going against the intention of providing equal opportunities for all
 - D. supporting the idea of sustainable development and economic growth

66. It can be inferred from the passage that ____.

- C
- A. international funding helps build successful mutual trade
 - B. education shoulders an ultimate responsibility in one's career
 - C. entrepreneurship eases joblessness and boosts community welfare
 - D. unemployment is the primary cause of crime in developing countries

Section C

- A. Lomas hopes that this will further our understanding of the brain, as well as boost knowledge of how and why humans consume music.
- B. The AI was then tested on unseen portions of the data, identifying songs with a precision of 85 per cent.
- C. The experiment was conducted to determine if AI could replace human musicians.
- D. This suggests that the AI's ability to identify songs highly depends on the individual's brain activity.
- E. The volunteers did this blindfolded and in a faintly lit room to minimise the effect of their other senses on the results.
- F. The researchers believe that this is due to each person's preference towards a song being unique.

Machine identifies songs from people's brainwaves

Artificial intelligence has learned to identify the songs someone is listening to from their brain readings.

Derek Lomas at Delft University of Technology in the Netherlands and his colleagues asked 20 people to listen to 12 songs through headphones. E Each person's brainwaves were recorded using an EEG (脑电图) cap that detects electrical activity.

The EEG readings from each person were cut into short pieces and used along with the matching music clip to train an AI to spot patterns between the two. B But the software struggles if it is trained on EEG data from one person and then attempts to identify a song when someone else listens to it. Accuracy in such tests fell to less than one in every ten attempts.

69 And people tend to focus on different elements of the music during training. Ultimately, however, they aim to identify aspects of EEG responses to music that are common to all humans.

70 A "I think it's really stimulating to think about how the combination of machine learning and high-density (高密度的) data from EEG can be combined to bring insights into moving emotional experiences, but also to figure out what's going on inside your head," he says.

Music is ultimately "just electrical signals," he says. "And it's the same with the EEG."

The proposal for growing organic cabbage needs to be submitted by next Thursday.

IV. Translation

72. 种植有机卷心菜的方案须在下周四前提交。(submit)
73. 北京烤鸭烤好时, 香味让所有外国食客都垂涎三尺了。(by the time)
74. 无论你下月是否离职, 做好手头的工作非常重要, 这是你人品的体现。(essential)
75. 这家两层酒店古色古香, 坐落于半山腰, 住店客人可以轻松登顶, 错峰参观纪念馆。(whose)

2025 翻译

Located halfway up the mountain, this two-storey hotel is antique, whose customers can reach the peak of the mountain with ease and visit the memorial during off-peak hours.

VI. Guided Writing

假设你是明启中学高三学生李明, 你们学校英语报开设了一个“排忧解难”专栏, 你的校友 Lynn 发出求助, 请根据她的来信写封回信:

写作要求:

- 1) 提出你的建议;
- 2) 说明你的理由。

Lynn 的来信大意如下:

I'm a high school student. I want to do some cooking, but my parents don't allow me to do so. How can I change their mind
